

# Pran Vaksen M

Mwen vle pwoteje tèt mwen ak moun ki bò kote m yo pou yo pa malad.

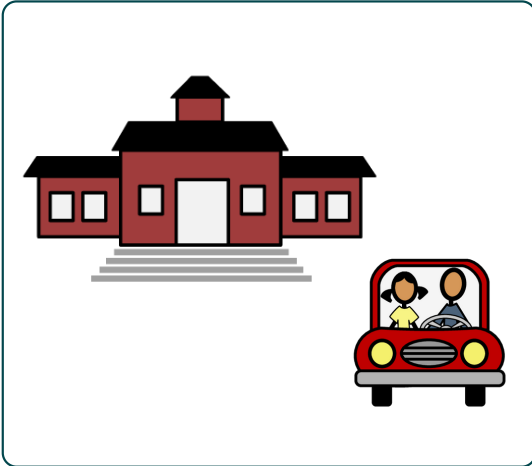

Yon vaksen se yon medikaman ki pwoteje moun pou yo pa malad.

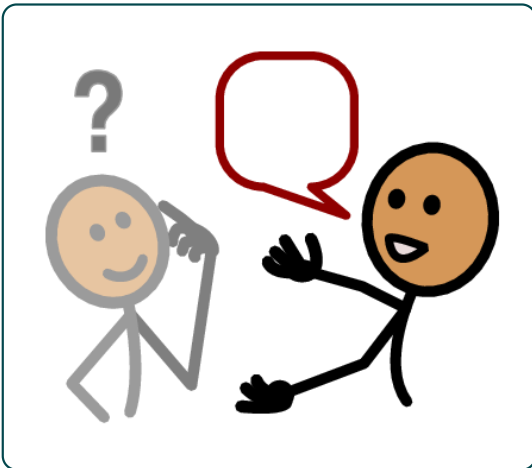

Pafwa ou bezwen yon sèl vaksen sèlman pa ane, pafwa ou bezwen plis selon vaksen an.

# Pran Vaksen M

Mwen ka pran yon vaksen nan nenpòt famasi, kay doktè oswa nan klinik.

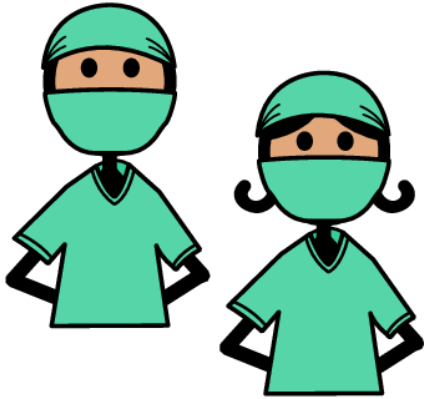

M ap antre nan bilding lan epi m ap bay non m, anivèsè nesans mwen pou m anrejistre, epi reponn kesyon asistan an poze.

Fanmi m ka ede m anrejistre. Yon asistan ap montre m ki kote pou m ale. Mwen prale avèk asistan an ak fanmi m.

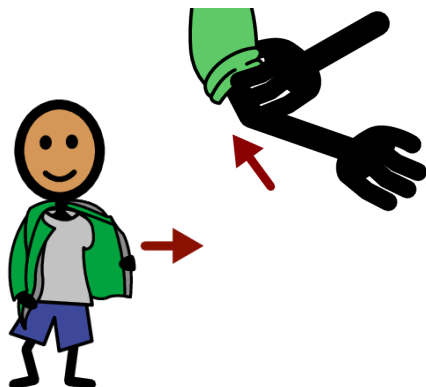

# Pran Vaksen M

Asistan yo ka abiye avèk blouz, gan, epi mask.

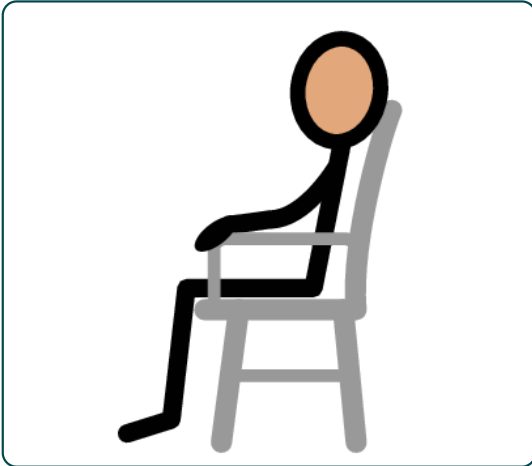

Menm si m pa ka wè figi yo, asistan yo kontan anpil pou yo wè m.

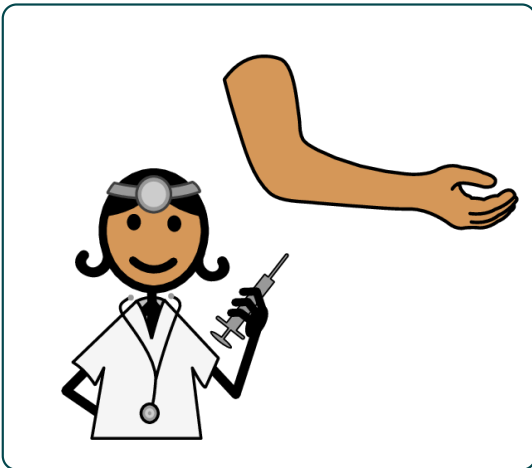

M ap twouse manch mwen oswa m ap wete djakèt mwen lè tou pa m rive.

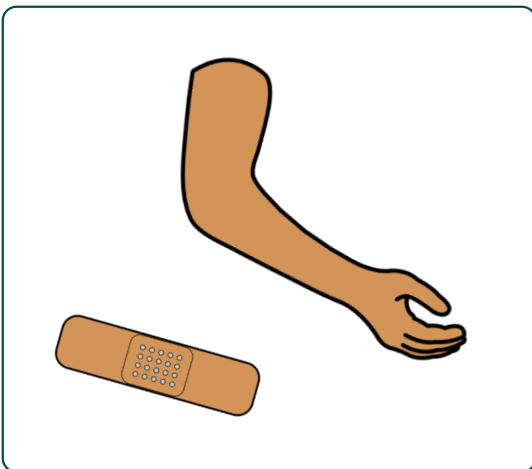

# Pran Vaksen M

Mwen pral chita sou yon chèz.  
Mwen pral eseye rete san  
bouje.

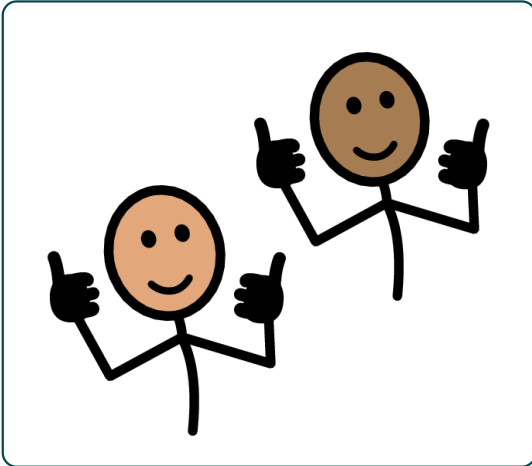

Yon enfimyè pral ban m piki a.  
Mwen ta ka santi yon ti zongle  
lè zegwi a antre nan bra m.

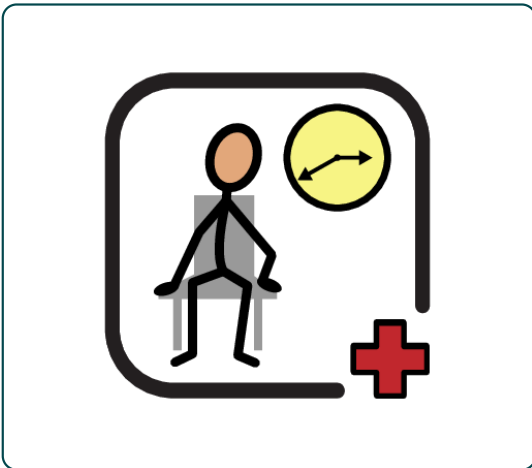

Enfimyè a pral mete yon ti  
pansman sou bra m.

# Pran Vaksen M

Fanmi m pral kontan anpil paske m ap anpeche tèt mwen malad.

Yo ka mande m pou m tann 15 minit apre vaksen m lan. Mwen ka anmezi pou m ale apre piki m lan.

Mwen ka kontinye asire sekirite pa m ak sekirite lòt moun yo lè m lave men m. Mwen fyè de tèt mwen paske m pran yon vaksen.
