

patience — **Autism** — persistence

For 60 years, the Autism Society has empowered the Autism community through advocacy, education, and support. This year, as we celebrate this milestone, our **Autism Is** campaign takes center stage, amplifying the voices and lived experiences of Autistic individuals.

Autism Is personal and collective—an identity, a culture, a way of life. It comes with strengths and struggles, moments of joy and challenge.

By embracing the full reality of Autism, we move beyond awareness toward acceptance and meaningful action.
